Senior UX/UI Designer Eller s.r.o.

07/2014 - 11/2018

Eller provides IT advisory and process automation services, deeply focusing on each individual customer. My goal in Eller was to build a User interface for End-to-end IT processes management applications. The Conclusion (build on Softshell framework) is currently used by over 10000+ employees in 5 countries. This web-based application contains 3 main modules: Service Desk, Demand/project management, and Test management. Wireframing and prototyping, A/B testing, Consultations. In addition, I trained a group of external partners to work with Conclusion as well as the Softshell framework.

BIO (OVERVIEW)

Born in 91 in Kosice, Slovakia. Right after becoming an adult, more specifically eleven years ago, I've decided to move away from my small hometown located in Eastern Slovakia and pursue a career in graphic design while extending my studies in Prague. Thanks to having a bit of free time on my hands, I've also taught myself how to code. After a few years, I felt like I needed a shift in my life again and therefore I've decided to fly to Denmark and to carry on with my bachelor's degree in Odense. However, it didn't take long for me to start feeling homesick and Prague seemed like the best choice to achieve my ambitions as well as staying close to my motherland. The decision to come back opened many doors of possibilities for me. I spent a few years working in Eller as a UX/UI designer, my main job essentially being the progress of an end-to-end IT processes management solution called Conclusion. In addition to working on my own projects, I currently work as an IT project manager and UX designer in Creamfinance Czech.
